September Milk Production

Milk production in the 21 major States during September totaled 9.94 billion pounds, slightly below production in these same States in September 1990. August revised production, at 10.3 billion pounds was 2 percent below August 1990.

Production per cow in the 21 major States averaged 1,187 pounds for September, 16 pounds above September 1990.

The number of cows on farms in the 21 major States was 8.38 million head, 8 thousand more than August but 136 thousand less than September 1990.

During the July-September period, the 21 major States produced 30.7 billion pounds of milk, 84.6 percent of the U.S. production. If producers in the remaining 29 States not surveyed monthly followed the same pattern as the 21 States, the U.S. production would be 12.4 billion for July, 12.2 billion pounds for August, and 11.7 billion for September.
